(Continued from last week.) How Watch Cases are Made.

In 1875, thirteen men comprised the entire working force used in the manufacture of the James Boss' Gold Watch Case. Now over five hundred are employed, and the number is constantly increasing. The reason of this increase is this: In the James Boss' Gold Watch Case all the metal-in sight and subject to wear is solid gold, while the re-mainder, which only lends strength to the case, is of stronger metal than gold, giving gold where gold is needed, and strong, elastic metal where strength and elasticity are needed, a combination producing a watch case better than solid gold and at one-HALF the cost.

Over 200,000 of these cases

have been sold, and every jeweler in the country can testify to their quality and merit.
